

Izzy Bennett

Mobile software engineer with 6+ years shipping Android and iOS apps used by millions. Technical lead for payments-critical systems at Square, scaling Offline Payments to 4M+ sellers and ~\$442M/yr in offline volume across mobile and custom hardware.

| PROFESSIONAL EXPERIENCE

July 2022–Present

Square

Mobile Software Engineer

- Technical lead for Offline Payments and Checkout on Square Point of Sale for Android and iOS across mobile and custom hardware, owning design, implementation, rollout, and long-term health of a ~\$442M/yr payment flow.
- Expanded Offline Payments to over 4 million sellers, raising enablement from ~40% to 92.6% of users and doubling its share of Square GPV (0.11% to 0.22%, ~\$34M in added offline volume).
- Drive projects across product, design, quality engineering, and partner teams, defining rollout strategy, launch criteria, and success metrics for payment-critical features.
- Safeguard payment reliability through staged rollouts, extensive test plans and UI testing, and metrics monitoring and alerting to prevent and swiftly recover from failures.
- Mentor and onboard engineers onto new projects and features to set them up for success.

June 2020–July 2022

Alarm.com

Android Software Engineer II

- Led development of large-scale Android projects, including a complete UI/UX refresh and app-wide Dark Mode for an app used by millions.
- Shipped features spanning the Android app and its backend services in close collaboration with product, design, and quality engineering.
- Wrote unit and UI tests with JUnit, Robolectric, and Espresso; built Gradle tasks and build scripts to streamline the build process.
- Mentored two interns and guided them to successfully ship a production feature.

June 2019–August 2019

Alarm.com

Android Software Engineer Intern

- Reconstructed the Android notification system and implemented bundled notifications.
- Improved accessibility across the Android application in collaboration with product managers and quality engineers.
